

Enhancing access and blended learning-Development of e-learning platform
Enrique Cosme

Most of the hospitals where ophthalmic surgery is performed need staff with a good base in ophthalmic surgery.

Although it is relatively easy to find nurses with experience in operating theatres, it is not so easy to find nurses with a good knowledge of ophthalmic surgery.

Moreover, it takes time to build a good and solid knowledge and skills in Ophthalmology because its one of the most technical specialties in medicine or at least the one who has evolved more quickly in the last 20 years.

In Moorfields we've developed a completely visual platform in which the staff that arrives for the first time to the ophthalmic surgical department can learn the ins and outs of this surgical specialty, from how to set up an operating theatre, how to scrub and assist in an ophthalmic surgery, understanding the key steps of the surgery.

This platform is not a normal book, nor an e-book nor an e-Learning platform. It's a mixture of the three of them, a new approach to learn the surgical skills most ophthalmic facilities demands nowadays.
